Professional Summary

Recent graduate of the Database Application Development & Programming program with comprehensive skills in software development, database design, and programming. Adept at creating efficient, scalable database solutions and developing robust applications to meet modern business needs. Passionate about solving complex problems through code and continuously expanding technical knowledge.

Education

Database Application Development & Programming

Lorenzo Walker Technical College

Graduated: May 2023

- Completed four-course program covering all aspects of database development and programming
- GPA: 3.8/4.0

Program Courses

- Information Technology Assistant
- Computer Programmer Assistant
- Computer Programmer
- Database Programmer

Technical Skills

Programming Languages:

JavaScript C# SQL

Web Technologies:

HTML5 CSS3 Bootstrap AJAX Node.js Express

Database Systems:

MySQL SQL Server MongoDB Database Design

Tools & Platforms:

Git/GitHub VS Code Vercel

Projects

Presentation Viewer

Database Programmer Course | 2023

- Developed a full-stack application for viewing and navigating presentations
- Built with Express, EJS, and Vue.js for a seamless user experience
- Implemented interactive navigation and dynamic content rendering
- [GitHub Repository](#)

Product Management System

Computer Programmer Course | 2022

- Created a web application for managing products, inventory, and categories
- Utilized PHP and MySQL for backend functionality
- Designed a responsive front-end with Bootstrap
- [GitHub Repository](#)

Cafe Management App

Computer Programmer Assistant Course | 2022

- Developed a desktop application for managing cafe orders and inventory
- Built with C# and WinForms
- Implemented order tracking and inventory management features
- [GitHub Repository](#)

Task Management App

Computer Programmer Assistant Course | 2022

- Built a React-based task management application with drag-and-drop functionality
- Implemented local storage for data persistence
- Created custom UI components and state management
- [GitHub Repository](#)

A Simple Recipe from the Heart

Information Technology Assistant Course | 2021

- Developed a static website showcasing simple, heartwarming recipes with easy instructions
- Designed with HTML, CSS, and responsive layout
- [GitHub Repository](#)

Playz Pizzeria Web App

Information Technology Assistant Course | 2021

- Created a static website for Playz Pizzeria with a dynamic pizza menu and descriptions
- Integrated GitHub for project version control
- [GitHub Repository](#)

Experience

IT Support Intern

Tech Solutions Inc.

June 2022 - August 2022

- Provided technical support to employees, troubleshooting hardware and software issues
- Assisted in maintaining company databases and performing data backups
- Documented technical procedures and created user guides

Programming Tutor

Technical Institute of America

January 2022 - May 2023

- Tutored fellow students in programming concepts and database design
- Assisted with debugging code and explaining algorithms
- Helped students develop problem-solving skills for programming challenges
