Professional Summary

Recent graduate of the Database Application Development & Programming program with comprehensive skills in software development, database design, and programming. Adept at creating efficient, scalable database solutions and developing robust applications to meet modern business needs. Passionate about solving complex problems through code and continuously expanding technical knowledge.

Education

Database Application Development & Programming

Lorenzo Walker Technical College

Graduated: May 2023

- Completed four-course program covering all aspects of database development and programming
- GPA: 3.8/4.0

Program Courses

- Information Technology Assistant
- Computer Programmer Assistant
- Computer Programmer
- Database Programmer

Technical Skills

Programming Languages:

JavaScript   C#   SQL

Web Technologies:

HTML5   CSS3   Bootstrap   AJAX   Node.js   Express

Database Systems:

MySQL   SQL Server   MongoDB   Database Design

Tools & Platforms:

Git/GitHub   VS Code   Vercel

Projects

Inventory Management System

Database Programmer Course | 2023

- Developed a full-stack application for tracking inventory with user authentication
- Built with Node.js, Express, MongoDB, and React
- Implemented CRUD operations and RESTful API endpoints

Student Registration Portal

Computer Programmer Course | 2022

- Created a web application for student registration with course selection
- Utilized PHP and MySQL for backend functionality
- Designed responsive front-end with Bootstrap

Task Management App

Computer Programmer Assistant Course | 2022

- Built a React-based task management application with drag-and-drop functionality
- Implemented local storage for data persistence
- Created custom UI components and state management

Experience

IT Support Intern

Tech Solutions Inc.

June 2022 - August 2022

- Provided technical support to employees, troubleshooting hardware and software issues
- Assisted in maintaining company databases and performing data backups
- Documented technical procedures and created user guides

Programming Tutor

Technical Institute of America

January 2022 - May 2023

- Tutored fellow students in programming concepts and database design
- Assisted with debugging code and explaining algorithms
- Helped students develop problem-solving skills for programming challenges
